

EXHIBIT VIII.C.8.b – Proposed Business Center Facilities

Submit as Exhibit VIII.C.8.b. a description of any proposed business center facilities.

The needs of the business traveler have changed significantly over the past few years. Business travelers are now able to conduct much of their business while on the go and are no longer tied to a desk or cubicle. Multi-tasking has reached new levels and business travelers today prefer to check e-mails and print boarding passes to their mobile passbook while having their morning coffee and scanning the headlines.

Capital View Casino & Resort will accommodate this new definition of productivity by turning the grand lobby, coffee shop, and hotel rooms into de facto business centers. Guests will find easy access to outlets for charging multiple devices, high-speed Internet, and quiet cozy seating arrangements in the lobby to facilitate their productivity.

Guest rooms will feature Wi-Fi access, spacious desks, improved lighting, and ergonomic rolling desk chairs while the front desk will keep plenty of power cords and cables on hand should guests forget theirs. Our front desk will also have a color printer available for those business travelers that still prefer to print their documents.
