

CASINO

Exhibit VIII.C.6.c

Plans to Differentiate the Casino

As with any Genting resort there are many amenities above and beyond the normal casino experience. The integrated resort offering is significantly different from the casinos that exist in America. Each market segment is addressed and tandem amenity packages are designed to encourage repeat visits.

This development is much more than a casino; it is an integrated resort that will promote tourism and extended stays in New York state. Many unique interior attractions with the resort make it a repeat destination for locals and visitors alike. These attractions include:

- A large indoor pool that converts to a spectacular nightclub
- A large buffet featuring featuring a beautiful view of the enclosed pool
- A food court designed like many of the new “night markets” in Singapore and Malaysia
- A wine bar that features local wines made in the state
- An American restaurant within steps of the outdoor pool and wetlands park
- An Asian gaming room at the center of the casino that creates a structure within a structure effect.
- Restaurants with their own gardens and attractions
- Two signature hotels
- Several incredible suites
- A signature restaurant lounge at the highest floor of the hotel
- An incredible multi-purpose room that can host almost any event

A connection to the great outdoors make this resort a popular getaway. It is connected to the nature that surround it through the following:

- Hotel spas and pools (heated for winter use)
- A wetlands nature boardwalk
- An Asian entertainment garden for alfresco dining from the Chinese restaurant
