

Exhibit X.C.5
Water Conservation

Submit as Exhibit X.C.5. a description of plans for water efficiency and conservation at the Gaming Facility including, without limitation, plans to use low--flow water fixtures, water efficient appliances, and implement water conservation at the Gaming Facility.

Design strategies will be incorporated to promote smarter use of water, within the building and on-site, to reduce potable water consumption. Our goal will be to reduce potable water use by 40% and to reduce landscape irrigation water use by 50% or more. The project team was successful at the Rivers Casino in Des Plaines, IL in achieving LEED Water Efficiency Prerequisite 1 (Water Use Reduction – 20%) and Credit 1 (Water Efficient Landscaping), and Credit 3 (Water Use Reduction – Reduce by 40%). This was achieved through the use of low-flow and sensor-controlled faucets, low-flow pre-rinse faucets and valves at kitchen areas, high efficiency flush valves at toilets and urinals.
