

Exhibit X.C.6
Renewable Energy

Submit as Exhibit X.C.6. a description of plans for procuring or generating on-site at least ten (10) percent of the facility's annual electricity consumption from renewable energy sources qualified by the New York State Energy Research and Development Authority (NYSERDA).

The Applicant will investigate the opportunity to integrate onsite renewable energy into the project design. In addition to implementing energy efficient design, enhanced commissioning and measurement and verification protocols, the Applicant will investigate the possibility of securing a minimum 2-year green power contract for 35% of the project's expected annual energy use. The Applicant will explore the application of state, federal and utility incentive programs to help reduce the first cost of any NYSERDA compliant on-site renewable energy systems integrated into the Project. The Applicant is reviewing the feasibility of solar/photovoltaics, wind and fuel cell technology.
