

VIII. ECONOMIC ACTIVITY AND BUSINESS DEVELOPMENT

C. LAND, CONSTRUCTION AND DESIGN OF PHYSICAL PLANT

15. DOCK AND LOADING

Submit as Exhibit VIII. C.15. a description of the planned dock and loading facilities, as well as armored car bay, including by square footage and schematic diagram. Describe their adequacy to serve the planned program (e.g. by comparison to analogous facilities).

The Casino and Hotel Complex is supported by two individual dock areas that are sized to accommodate all proposed uses for the development:

The main **South Dock and Warehouse** facilities service the Casino, Restaurants, and Hotel. With 5 truck bays, along with Trash and Recycling equipment, the dock feeds a large 50,000 square foot Warehouse space. Also adjacent to this area are Liquor Distribution, Slot Tech and Maintenance Facilities. The dock areas all feed service corridors that reach to all corners of the building, with easy access to Casino, Hotel, Restaurants and the like.

Opposite of the main South Dock, on the North elevation is a **Convention & Event Truck Dock** and **Entertainer's Bus Parking** area. All are adjacent to BOH stage facilities of the Live! Performance Venue and are at Convention floor level. Oversized elevators enable large equipment and promotional materials, as well as vehicles to be delivered to the Casino Gaming Areas above.

A VIP Bus Parking area is designated for entertainers and media vehicles, and is directly connected to a private performer's entrance supporting Green Rooms, Lounges and other BOH spaces.

Located within the main Dock area, related to the Cash Control and Security functions is an **Armored Truck Dock Bay** with Security offices and a dedicated elevator up to the main Cage of the Casino above.
